

## GEOGRAPHIC DISTRIBUTION

Instructions for contributors to Geographic Distribution appear in Volume 26, Number 1.

### CAUDATA

**AMBYSTOMA TIGRINUM MAVORTIUM** (Barred Tiger Salamander). USA: NEBRASKA: MORRILL Co: SE 1/4 Sec. 25, T22N, R52W. June 1993. Roger Heigel. Verified by Jeffrey Mitton. UCM 57354, dried adult now in alcohol. First county record (Lynch 1985, Trans. Nebraska Acad. Sci. 13:33-57).

Submitted by **RICHARD L. HOLLAND**, Science Department, Boulder High School, 1604 Arapahoe Avenue, Boulder, Colorado 80302, USA, and **HOBART M. SMITH** and **DAVID CHISZAR**, University of Colorado Museum, Boulder, Colorado 80309-0218, USA.

**DESMOGNATHUS AENEUS** (Seepage Salamander). USA: SOUTH CAROLINA: OCONEE Co: Reedy Branch (Rainy Mountain Quadrangle), 34°48'22"N, 83°17'53"W, elev. 365-425 m. 5 June 1995. D. Jackson, P. G. Livingston, C. C. Spencer, B. L. Stuart. Verified by Richard C. Bruce. Charleston Museum (ChM CA4392-CA4394). Three adult specimens collected under leaf litter on bank of Reedy Branch tributary. First record for South Carolina (Harrison, pers. comm., Harrison 1992, Cat. Am. Amph. Rept. 534.1-534.4); Camp Branch (Rainy Mountain Quadrangle), 34°45'48"N, 83°18'43"W, elev. 365-425 m. 21 July 1995. E. Danell, P. G. Livingston, C. C. Spencer, B. L. Stuart. Verified by Richard C. Bruce. Charleston Museum (ChM CA4395-CA4396). Two adult specimens collected under moss and leaf litter on bank of seep flowing into Camp Branch. Second record for South Carolina.

Submitted by **P. GAYLE LIVINGSTON**, **CHRISTINE C. SPENCER**, and **BRYAN L. STUART**, Highlands Biological Station, P. O. Box 580, Highlands, North Carolina 28741, USA.

**SIREN INTERMEDIA** (Lesser Siren). USA: TEXAS: KAUFMAN Co: 6.4 km NW Mabank. Two specimens collected from a small pond along Old Rt. 40, 0.8 km W U. S. Rt. 175. 23 July 1993. R. L. Gutberlet, Jr. and D. S. Figueroa. Verified by J. A. Campbell. University of Texas at Arlington Collection of Vertebrates (UTA-A 40755-56). New county record (Dixon 1987, Amphibians and Reptiles of Texas. Texas A&M Univ. Press, College Station. 434 pp.).

Submitted by **RONALD L. GUTBERLET, JR.** and **DANIEL S. FIGUEROA**, Department of Biology, University of Texas at Arlington, Arlington, Texas 76019, USA.

### ANURA

**ELEUTHERODACTYLUS PLANIROSTRIS** (Greenhouse Frog). USA: LOUISIANA: EAST BATON ROUGE PARISH: Baton Rouge, Greenhouse at 17810 Sotile Drive, ca. 2.0 km NE jct. Interstate 10 and Highland Road. 27 July 1995. Mike Leggio and Steven Platt. Verified by Richard R. Montanucci. One adult and three neonates collected. Vertebrate Collection, Department of Biological Sciences, Clemson University (CUSC 1263). Parish record; nearest reported populations are in Jefferson Parish (Dundee and Rossman 1989, Amphibians and Reptiles of Louisiana. Louisiana St. Univ. Press, Baton Rouge. 300 pp.). Extends range ca. 100 km northeast. Appears established at this site; 50+ neonates were observed throughout the greenhouse. Original introduction probably in houseplants from Florida.

Submitted by **STEVEN G. PLATT** and **LANCE W. FONTENOT**, Department of Biological Sciences, Clemson University, Clemson, South Carolina 29634-1903, USA.

**GASTROPHRYNE OLIVACEA** (Great Plains Narrowmouth Toad). USA: TEXAS: FLOYD Co: 2.4 km E Barwise. 6 June 1995. Ann M. Anderson, James T. Anderson, and David A. Haukos. Verified by Stephen L. Williams. Museum of Texas Tech University (MTTU 11489). County record; several adult males were heard and seen calling at 2100 h in a flooded playa wetland. The dominant vegetation type was *Coreopsis tinctoria*. This record extends the range northward (Dixon 1987, Amphibians and Reptiles of Texas, Texas A&M Univ. Press, College Station. 434 pp.). This species was also discovered in Crosby County, directly south of Floyd, on 6 June 1995 and one specimen was caught (MTTU 11490). Previously documented in Crosby County below Whiter River Reservoir Dam. The Crosby County individuals were found in a flooded playa wetland, 7.3 km S Crosbyton, also in association with *Coreopsis tinctoria*; both playas had an irrigation pit filled with water most of the year. This record fills the hiatus in current known county distribution of this species—Briscoe County to the north and Crosby and Lubbock counties to the south.

Submitted by **ANN M. ANDERSON**, **JAMES T. ANDERSON**, and **DAVID A. HAUKOS**, Range and Wildlife Department, Mail Stop 2125, Texas Tech University, Lubbock, Texas 79409, USA.

**GASTROPHRYNE OLIVACEA** (Great Plains Narrowmouth Toad). USA: TEXAS: HUDSPETH Co: 14.81 road km S jct. FR 34 and FM 192 on FM 192. 18 July 1995. C. M. Eckerman and T. J. LaDuc. Verified by C. S. Lieb. UTEP 16138-16140, 16146-16148. New county record; extends range approximately 120 km NW of nearest known locality in Jeff Davis County (Dixon 1987, Amphibians and Reptiles of Texas. Texas A&M Univ. Press, College Station, Texas. 434 pp.). Found in ephemeral ponds on the E and W sides of the road. All specimens collected were calling males.

Submitted by **CURTIS M. ECKERMAN**, Department of Biological Sciences, The University of Texas at El Paso, El Paso, Texas 79968-0519, USA.

**HYLA ANCEPS** (NCN): BRASIL: ESPÍRITO SANTO: ARACRUZ: Barra do Sahy (19°50'S, 40°04'W, sea level). 26-27 January 1995. C. F. B. Haddad, J. P. Pombal, Jr. and J. L. Gasparini. Verified by Ulisses Caramaschi. Museu Nacional do Rio de Janeiro (JNRJ 17318). Published distribution of the species is lowlands of the state of Rio de Janeiro in southeastern Brazil (Frost 1985, Amphibian Species of the World. Allen Press, Lawrence, Kansas. 732 pp.). First documented record for the state of Espírito Santo, extending the distribution northward.

Submitted by **CÉLIO F. B. HADDAD**, **JOÃO L. GASPARINI**, Departamento de Zoologia, Universidade Estadual Paulista, C. P. 199, 13506-900 Rio Claro, São Paulo, Brasil, and **JOSÉ P. POMBAL, JR.**, Departamento de Zoologia, Universidade Estadual de Campinas, C. P. 6109, 13083-970 Campinas, São Paulo, Brasil.

**PSEUDACRIS CLARKII** (Spotted Chorus Frog). USA: TEXAS: FLOYD Co: 2.4 km E Barwise. 5 May & 16 May 1995. Ann M. Anderson, James T. Anderson, and David A. Haukos. Verified by Stephen L. Williams. Museum of Texas Tech University (MTTU 11486-11488). County record; several adult males were heard and seen calling after dark in a flooded playa wetland. Previous records include most counties surrounding Floyd, except those to
